The MAILING L	DATE of this communication app				Iress				
Period for Reply									
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).									
Status 1)⊠ Responsive to	communication(s) filed on 01 I	November 20	001						
· · · · · · · · · · · · · · · · · · ·	. ,								
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213. Disposition of Claims									
	is/are pending in the application	on.							
4a) Of the above claim(s) is/are withdrawn from consideration.									
5) Claim(s) is/are allowed.									
6) Claim(s) is/are rejected. 7) Claim(s) is/are objected to.									
· · · · · · · · · · · · · · · · · · ·	are subject to restriction and/or	r election rea	uirement						
Application Papers	are subject to rectification and/or	. 0.000.011109	an ornorn.						
9)☐ The specification	n is objected to by the Examine	er.							
10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.									
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).									
11) The proposed drawing correction filed on is: a) approved b) disapproved by the Examiner.									
If approved, corrected drawings are required in reply to this Office action.									
12)☐ The oath or declaration is objected to by the Examiner.									
Priority under 35 U.S.C.	§§ 119 and 120								
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).									
a) ☐ All b) ☐ Some * c) ☐ None of:									
1. Certified copies of the priority documents have been received.									
2. Certified copies of the priority documents have been received in Application No									
3. Copies of the certified copies of the priority documents have been received in this National Stage									
	cation from the International Bu detailed Office action for a list			d.					
14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).									
a) The translation of the foreign language provisional application has been received.									
15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group 1 is drawn to claims 1-36 that claim a laser device comprising a target position, optical component, a laser energy source each separated by appropriate distances, and a laser source manipulation mechanism exhibiting a mechanical resolution less than a spatial resolution of laser energy at the target position.

Group 2 is drawn to claims 37-54 that claim a laser device comprising a target position, optical component, a laser energy source separated by appropriate distances, and a laser source manipulation mechanism comprising a mechanical index that comprises a pivot point for lateral and vertical motion.

Group 3 is drawn to claims 55-63 that claim a laser device comprising an optical component, a laser energy source separated from the optical component, and a laser source manipulation mechanism comprising a Peaucellier linkage.

Group 4 is drawn to claims 64-73 that claim a laser device comprising a target position, optical component, a laser energy source located outside the adverse environment, and a laser source manipulation mechanism comprising electro-mechanical parts located outside the adverse environment.

Group 5 is drawn to claims 74-80 that claim a laser device comprising a target position, optical component, a laser energy source each separated by appropriate distances, and a laser source manipulation mechanism linking vertical and lateral laser source motion to the respective

Art Unit: 2881

indices producing related displacement of energy at the target position and exhibiting a mechanical resolution less than a spatial resolution of the respective vertical and lateral displacement of the laser energy at the target position.

Group 6 is drawn to claims 81-92 that claim a laser device comprising a target position, optical component, a laser energy source separated from the optical component and having the appropriate lateral and vertical rotational axis, and a laser source manipulation mechanism laterally and vertically positioning the laser source.

Group 7 is drawn to claims 93-106 that claim a laser device comprising a target position within a high magnetic field, an optical component, a laser energy source separated from the optical component, a laser source manipulation mechanism laterally and vertically positioning the laser source, and a damping device operating under Lenz' Law.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 19 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Application/Control Number: 10/003,905

Art Unit: 2881

1 Tullio

the election, applicant must indicate which are readable upon the elected species. MPEP §

809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct,

applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission

may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Paul Gurzo whose telephone number is (703) 306-0532. The

examiner can normally be reached on M-Thurs. 7:30 - 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, John Lee can be reached on (703) 308-4116. The fax phone numbers for the

organization where this application or proceeding is assigned are (703) 872-9318 for regular

communications and (703) 872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 308-0956.
